

Judd Gatbonton

ux designer + developer

work experience

Infosys, UX Designer

Aug 2019 — Present

- Currently working as a UX/UI consultant at a wide range of Fortune 500 companies across a variety of industries.
- Applied various user research methods to create personas, journey maps, and service blueprints in order to drive client's business decisions and final prototypes.
- Utilized Figma to design screens that are intuitive and aesthetically pleasing for all users.
- Conducted design workshops to better understand stakeholder insight.
- Helped deliver ~2M USD worth of business with another ~5M+ USD in pipeline through the design workshops and major redesign of a client's application.

No Desk Project, UX Design Lead

Aug 2018 — Feb 2019

- Increased job applications by 25% after the first month by redesigning entire Jobs Board to better experience for job seekers and employers; utilized personas, storyboarding, wireframing through Sketch and InVision, and began implementation with HTML/CSS and JavaScript.
- Created wireframes and mockups through Sketch and InVision, focusing on the Affiliate and Team pages. Designed the Affiliate page with conversion funnel in mind.
- Implemented intuitive design workflows and polished existing UI with best practices.
- Researched design standards and suggested enhancements to engineering team.

CAIDA, Webmaster Assistant

Aug 2017 — Oct 2017

- Researched and indexed CAIDA papers, creating files in YAML format and integrating files into CAIDA database.
- Utilized HTML/CSS to maintain pages with lists of papers using CAIDA data.

projects

Guiltea Cravings Website

- Worked as a designer & developer to build a redesigned website for a San Diego boba shop.
- Applied interviews with the client and users, personas, storyboarding, competitive analysis, user testing, wireframing, iterations.
- Created hi-fidelity prototypes through Sketch and InVision.
- Implemented site utilizing JavaScript, HTML/CSS, Bootstrap along with JavaScript plugin Instafeed and Google Maps API.
